

The Company

More than four decades have passed since 1976 and words like Quality, Experience and Know-how are still synonymous with MW Industries.

Through the personal involvement of founder Peter Mess and our dedicated group of employees, we have built a strong reputation and excellent track record within the custom manufacturing business and with our customers.

We know our business and we work hard to know yours too. Everyday our team puts their expertise, experience and skills to work delivering the precise product you need. Whether you are looking for custom washers, special fasteners or metal stampings, we are your ultimate resource. Dedicated to the future, we apply new and different techniques to complement existing services.

In today's competitive marketplace, accuracy and speed are essential. We have a complete inventory of material and tools for a quick turnaround in our ever-expanding plant situated on an eight acre site. MW's field proven products satisfy customers who demand and expect accurate performance and reliability. Every product we make is backed by our promise of dependable service and consistent high quality.

From concept to product delivery, our expert team is here and ready to serve you.

The MW Advantage

- Modern facility invested in the future
- Responsive timing on quotes
- One of a kind and large quantities
- Fabricating to your specifications
- Full machine shop
- Rush orders welcome
- High quality standards
- Guaranteed traceability
- 1 ton to 500 ton capacity
- On-time delivery

Tool & Die

Custom manufacturing is not a sideline at MW, it's all we do. For some, custom fabrication may sound slow but to our ears it's everyday business. You can expect a fast turnaround with our large tool and die inventory. We work with all types of material to produce ordinary and extra-ordinary jobs. Our tool & die personnel can assist you with any unique design and material specifications or fabricate from your existing drawings.

Throughout our entire process the quality of your product is MW's top priority. From the specification stage to the heat treatment and finishing departments, rigorous quality control standards are maintained. You can rely on us.

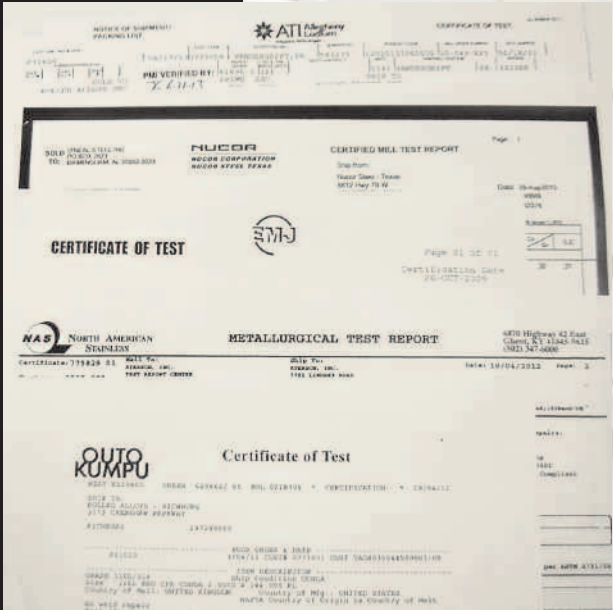

Punch Presses

We're proud to be one of the few companies that offer a full range of services to produce an endless array of washers, fasteners and stampings. With punch presses ranging from 1 to 500 tons, we can manufacture any washer, fastener or metal stamping.

One example is our 500 ton press has a blanking capacity of 12" diameter x 1/2" thick or 25" diameter x 1/4" thick steel and a substantial deep draw capacity. We have significantly improved our stamping/press department by adding a 200 ton press, eight new Aida presses and new Littell Servo Feeders. Coil handling equipment, press brakes and shears complete this department allowing us the versatility to handle any production run efficiently.

Our quality control is second to none. A strict adherence to quality is required throughout the manufacturing process. MW uses fully traceable, high quality materials. Among the common and the not so common materials used are hastelloy, monel-nickel, stainless steel, aluminum, brass, copper, carbon steel, lead, silver, nylon, plastics and other non-metallic materials. Mill test reports are available upon request.

Quality & Sales

Our employees take tremendous pride in craftsmanship and attention to detail. You can be assured that no matter what your need, no matter how specialized, our guarantee to you is perfection. Quality control is mandated at every level of the manufacturing process – from design through the final testing of every product prior to shipment. Our quality and inspection methods are superior to industry standards.

We know the importance to our customers of responsive timing on quotes, completing jobs on time and reliable, quick shipping. Service is often a word tossed about loosely in today's world. At MW our complete focus is your total satisfaction. Our experienced sales staff works closely with each client to customize products and meet all specifications. To handle your emergency requirements, we are available 24 hours a day.
